[Exchange 2019] Guide to Add Email Account on Windows Mail

1) Open Windows Mail by going to Start -> All Apps -> Mail

2) Go to Settings (gear icon) -> Manage accounts -> Add account

3) Select "Advanced setup", then select "Exchange ActiveSync"

4) Enter the following configuration:

> Email address: <your email address>
> Password: <your password>
> User name: <your email address>
> Domain: S19
> Server: webmail19.mycloudmailbox.com
> Server requires encrypted (SSL) connection: Yes (Tick)
> Account name: <any descriptive name for your own reference>

5) Lastly, when prompted "Are you trying to add, update, or remove your email account?", click on "Yes"
